

Dr. Bailey has served as principal investigator for more than 200 Phase 1 to 4 clinical trials. He has a particular interest in medical devices, human factors testing, and real-world trials.

Timothy Bailey, MD, FACE, FACP

Dr. Bailey is the President of the Headlands Research - AMCR Institute in Escondido, CA, and a clinical associate professor of medicine at the University of California at San Diego, where he helps train endocrinology fellows.

He is a past president of the California chapter and former board member of the American Association of Clinical Endocrinologists.

He is an interventional endocrinologist and has served as principal investigator on more than 200 Phase 1 to 4 clinical trials testing new medications and technology for diabetes including sensors, delivery devices, and the "artificial pancreas." He has more than 150 peer-reviewed publications.

He has a particular interest in medical devices, human factors testing, and real-world trials and strives to improve adherence, persistence, and effectiveness of therapies for people with diabetes.
